

```
1 def reverseLinkedList(head):
2     # Write your code here.
3     pass
4
```

Submit Code

```
14 while loop == True
15
16 def getNewLine():
17     newline = ""
18     while newline == "":
19         newline = getLine()
20     return newline
21
22 def getLine():
23     line = input()
24     if line == "":
25         return ""
26     return line
27
28 while True:
29     getNewLine()
30     newline = ""
31     while newline == "":
32         newline = getLine()
33     print(newline)
```

Run or submit code when you're ready.
