2
3 import java.util.Arrays;
4
5 class Program {
6     // O(n + m) time | O(m) space
7     public static boolean knuthMorrisPrattAlgorithm(String string, String substring) {
8         int[] pattern = buildPattern(substring);
9         return doesMatch(string, substring, pattern);
10    }
11
12    public static int[] buildPattern(String substring) {
13        int[] pattern = new int[substring.length()];
14        Arrays.fill(pattern, -1);
15        int j = 0;
16        int i = 1;
17        while (i < substring.length()) {
18            if (substring.charAt(i) == substring.charAt(j)) {
19                pattern[i] = j;
20                i++;
21                j++;
22            } else if (j > 0) {
23                j = pattern[j - 1] + 1;
24            } else {
25                i++;
26            }
27        }
28        return pattern;
29    }
30
31    public static boolean doesMatch(String string, String substring, int[] pattern) {
32        int i = 0;
33        int j = 0;
```

Solution 1

Solution 2

Solution 3

```
1 class Program {
2     public static boolean knuthMorrisPrattAlgorithm(String string, String substring) {
3         // Write your code here.
4         return false;
5     }
6 }
7
```

Our Tests

Custom Output

Submit Code

```
1 class Program {
2     public static boolean knuthMorrisPrattAlgorithm(String string, String substring) {
3         // Write your code here.
4         return false;
5     }
6 }
```

Run or submit code when you're ready.
